YOUR PLASTICISERS NEWS UPDATE

*European Plasticisers wishes you
a wonderful holiday season and a happy 2021!*

ALL WE WANT FOR CHRISTMAS IS... LIGHTS!

It is now time to put up your Christmas lights... and you wouldn't be able to light them up without plasticisers! As plasticisers are essential in wires and cables, they of course play a key role in making your lights durable so that you can put them up the following year!

You can also check out all the other uses of plasticisers in [wires & cables here](#)!

Curious about how Christmas lights are made? Check out this video by Insider!

NEW INFOGRAPHIC ON MEDICAL APPLICATIONS

**Did you know plasticised PVC
provides outstanding & safe performance in
modern healthcare?**

Whether it is safety, durability, cost efficiency...
even sterilisation and biocompatibility, flexible PVC
presents many advantages within the medical sector
with a wide variety of uses.
